Jaden Thomas

(480)789-0436 | Jadent183@gmail.com | https://jadent183.github.io/jadenthomas.github.io/

Skills Summary

Programming Languages: Java, Python, SQL, C#, C++, Go/Golang
Other Skills/Frameworks: Spring Boot, Kafka, Cloud Computing (GCP), Kubernetes, Supabase, React, Selenium, Maven
Software Development: Object-Oriented Programming, Software Development Lifecycle (SDLC), Software Testing & Verification, Debugging, Systems Integration, REST APIs, System Design

Work Experience

Visa Inc, San Francisco, CA *September 2025 – Present*
Software Engineer

- Designed and Migrated **Golang** data pipelines to **Kafka** producer/consumer pipelines processing **2800 transactions per second (TPS)**, improving the scalability and reliability of **Apache Cassandra** database updates.
- Deployed, tested, and maintained **12 Golang** microservices across production and development environments on **Google Cloud Platform**, monitoring system performance and troubleshooting issues, achieving **99.999% uptime** on supported applications.
- Built internal **Python** CLI tooling to catch early Maven dependency security vulnerabilities before code commits, improving code quality and CI/CD efficiency across the team.

Wells Fargo, Charlotte, NC *June 2024 – August 2024*
Software Engineer Intern – Technology Department fintech

- Built a full-stack database aggregator using **C#, Blazor,** and **SQL Server**, reducing query latency by **50%** through caching and query optimization.
- Built automated testing suites using **Selenium**, achieving 100% code coverage and improving full system reliability.
- Documented technical documentation in **Confluence**, ensuring smooth project handoff.

Sandhills Global, Scottsdale, AZ *September 2023 – May 2024*
Software Developer Intern

- Built backend services in **C#/.NET** with **SQL Server**, implementing database operations and optimizing query performance.
- Developed reusable components supporting internal applications, reducing duplicated backend logic.

Leadership Experience

Phar-Mini ASU Research Project, Tempe, AZ *September 2023 – November 2025*
Software Engineering Manager & Product Owner

- Directed a **14-person** team of students and professors, collaborating with stakeholders to design and ship a web-based simulation game that reached **~2,900 students** in ASU's Industrial Engineering curriculum.
- Owned product vision for stakeholders and clients, delivering **17 feature releases** that expanded gameplay mechanics and improved student learning outcomes.
- Implemented CI/CD GitHub pipelines for efficient deployment, leading development of **200 features** while managing issue tracking, branch management, and merge conflict resolution.

Projects

C++ Compiler Construction | C++

- Built a predictive descent parser in **C++** to recognize a custom programming language.

Co-Founder – Hugs-n-Games | GDScript, Python, Supabase, Railway, SQL

- Architected complete backend infrastructure using **Python, GDScript,** and **Supabase** for multiplayer mobile game functionality.
- Designed **5 database schemas** and deployed **18 RESTful APIs** with authentication, caching, and server-side anti-cheat.

CIA Swarm Project | C#, C++

- Collaborated in a team of **6** on a CIA-sponsored project to develop an autonomous rover system, Responsible for initial system design.
- Designed path-finding algorithms (**DFS, BFS**) for efficient traversal and coordinated state sharing across devices.
- Wrote comprehensive technical documentation following CIA guidelines.

IntelliNotes | Next.js, React, Google speech-to-text, Google Translate, ChatGPT API
2nd Place Educational Technology: Hack SoDa 2024

- Developed a real-time lecture translation tool that improves learning accessibility for multilingual classrooms by automating transcription, translation, and summarization using **Google speech-to-text, Google Translate,** and the **ChatGPT API**.

Education And Certifications

Arizona State University – Tempe, AZ
BS, Computer Science - May 2025
Microsoft Certified: Azure Cloud Fundamentals (AZ-900)
